To Whom It May Concern:

I am against reopening the border to Canada until the U.S. and Japan get their export situation straightened out. If the U.S. does start exporting beef to Japan, will Japan shut down the exports if we import live cattle from Canada? I believe it is Canada's fault we lost our exports to Japan. I have 200hd of cows and 3000hd of stocker cattle on wheat pasture and 1000hd of cattle in the feed yard. My way of life greatly depends on the cattle market.

Sincerely

Jim Friemel
